

Data-Driven Healthcare

HomeSolutions.NET[®]

“HomeSolutions.NET has been such a time saver for our company, decreasing administrative hours spent doing data entry and manual tracking. We can buzz through payroll, billing, and OASIS quicker than ever and I am impressed with all the reports and dashboards!”

Sue Keenan RN

*Director of Clinical Services
Comfort Care Medicare, Inc.*

Powerful. Flexible. Accurate.

HomeSolutions.NET is a comprehensive cloud-based agency management EMR solution proven to help home health organizations improve clinical, operational, financial and regulatory performance.

MobileTOUCH™

The revolutionary Point-of-Care application that works online or offline on today's popular tablets. This easy-to-use tool facilitates quick, timely documentation at the point-of-care, improving accuracy and patient care.

Manager

The industry-leading data management solution for Home Health and Hospice. The configurable, dashboard-driven approach supports optimized workflow, Quality Assurance and Continuous Quality Improvement.

RevNET™

A cloud-based revenue cycle management (RCM) solution that helps achieve highly efficient, compliant revenue performance by producing cleaner, quicker claims with less effort.

For field staff, homecare agencies can choose between Scannable Forms, Telephony or Mobile Device-based point-of-care methods, from nursing and therapy to paraprofessional disciplines.

With the web-based HomeSolutions.NET Manager, agencies can effectively manage workflow by moving away from paper-driven processes. From admissions to scheduling, coding, orders, visit reconciliation, eligibility, billing, AR, HR and payroll preparation processes, HomeSolutions.NET can improve revenue cycle management performance and overall efficiency.

HomeSolutions.NET can provide an immediate return on investment and is designed with a compliance-driven approach. Physio-Control has a successful track record of meeting regulatory deadlines with rich features and responsive, professional service and support.

Chart. Communicate. Collaborate.

HomeSolutions MobileTOUCH is a finger-friendly point-of-care solution that combines the power and secure accessibility of cloud computing with the ease of use of a web browser. HomeSolutions MobileTOUCH is more than an “app”, and is designed to work on a wide variety of platforms including Android™, IOS™ and Windows® devices. HomeSolutions MobileTOUCH enables service documentation at the point-of-care without the heavy synchronization or persistent connection challenges typical of traditional point-of-care approaches.

Highlights:

- HTML5 Browser-based, iPad™ Optimized
- Online or Offline Capability
- Electronic Signature via Touch/Tablet
- Medications at the Point-of-Care
- Instant Response Validations and Error Checking
- HomeSolutions Mobile Chart with Key Information
- Scheduling Integration
- Comm Notes, myMessages, Alerts and Orders

Dashboard-driven workflow.

Move away from paper-driven processes and streamline operational workflow across your organization with HomeSolutions Manager. From Intake/Referral to scheduling, coding, orders, visit reconciliation, billing, AR, HR and payroll prep processes, HomeSolutions Manager can help make you more efficient.

Highlights:

- Intake/Referral Management with built-in PECOS status checks throughout
- Flexible role-based security with personalized dashboards and report views
- Real-time hospital readmission tracking, reporting and analysis
- Electronic charts with document manager
- Visual Visit Reconciliation, matching schedule to orders/auths to visits
- QA and validation checking throughout all processes
- Support for multiple business lines and multiple sites

Accelerate all phases of your revenue cycle.

HomeSolutions RevNET helps agencies improve their financial performance by automating much of the billing process and providing a continuous data stream – from data collection, to claims generation, to AR collection. Numerous integrated pre-billing checks will help your agency maximize your allowable revenue and stay in compliance with regulatory requirements.

Highlights:

Complete Revenue Cycle Management

- GL Builder creates validated GL code structure
- Electronic batch claim creation and payer level pre-billing checks
- Full AR management including ERAs, cash receipts adjustments
- Month-end close process creates valid, static journal entries

Financial and HR Management Dashboards and Reporting

- Gain real-time insight into agency financial performance
- Shorten DSO cycle and improve cash flow
- Identify revenue, again, PPS performance and other key metrics
- RediPay™ handles TLM and payroll pre-processing

“The training and support we have received has been excellent, and we could not run our business today without the solution. Going with HomeSolutions.NET has been the best business decision we have ever made.”

Jeffrey A Severson
President
CNS Home Health Care

We pioneered cloud-based homecare electronic medical record software and HomeSolutions.NET can provide an immediate return on investment. Designed with a compliance-driven approach, Physio-Control has a successful track record of meeting regulatory deadlines with rich features and responsive, professional service and support.

Delivering Software as a Service is our specialty, and we're passionate about it. We believe that serving your business is both a privilege and a responsibility. We strive to maintain that business by providing you with software and services to help your organization improve clinical, operational and financial performance. As your solutions partner, we are dedicated to enabling your success.
